| Sommario/riassunto      | This small volume is devoted to one of the most common patient complaints encountered by practitioners of adult medicine, and one that frequently presents the initial examining physician with a diagnostic conundrum. Few internists, primary care physicians, emergency room physicians, or medical or surgical subspecialists are thoroughly familiar with the neurologic, orthopedic, immunologic, and vascular causes of leg pain, and help from the literature requires access to multiple texts from diverse medical and surgical specialties. Leg Pain brings together, in a compact and easily t |
