| Note generali           | Description based upon print version of record.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Nota di bibliografia    | Includes bibliographical references and index.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Nota di contenuto       | Vascular surgeons of antiquity -- Early vascular repairs and anastomoses -- William Hunter -- John Hunter -- Astley Cooper -- Development of the venous autograft -- Evolution of aortic surgery -- Operation on the carotid artery -- Valentine Mott -- Rudolph Matas -- The arterial prosthesis: Arthur Voorhees -- Contributions from the battlefield -- Venous surgery -- Extra-anatomic bypass -- Mathieu Jaboulay -- Eugene Villard -- Alexis Carrel -- Rene Leriche -- Jean Kunlin -- Charles Dubost -- Jacques Oudot -- Charles Dotter: interventional radiologist -- Thomas Fogarty -- Juan Parodi. |
| Sommario/riassunto      | Since the publication of the first edition 15 years ago, vascular surgery has been transformed into a new specialty incorporating endovascular surgery and techniques. These innovations are detailed in this much anticipated second edition. Like the first edition, this new edition of A History of Vascular Surgery paints engaging portraits of the surgeons and scientists whose ideas and practices underlie, and continue to influence, vascular surgery as we know it today. Written for the practitioner and student alike, the second edition provides an in-depth,                              |
