

1. Record Nr.	UNINA9910143456003321
Titolo	Automata, languages and programming : 26th International Colloquium, ICALP'99, Prague, Czech Republik, July 11-15, 1999 : proceedings / / Jiri Wiedermann, Peter van Emde Boas, Mogens Nielsen (editors)
Pubbl/distr/stampa	Berlin : , : Springer, , [1999] Â©1999
ISBN	3-540-48523-6
Edizione	[1st ed. 1999.]
Descrizione fisica	1 online resource (XIV, 726 p.)
Collana	Lecture notes in computer science ; ; 1644
Disciplina	005.13
Soggetti	Programming languages (Electronic computers) Machine theory Formal languages
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Invited Talks -- Generating Hard Instances of the Short Basis Problem -- Wide Area Computation -- Proof Techniques for Cryptographic Protocols -- Type Structure for Low-Level Programming Languages -- Real Computations with Fake Numbers -- A Model for Associative Memory, a Basis for Thinking and Consciousness -- Numerical Integration with Exact Real Arithmetic -- Observations about the Nature and State of Computer Science -- DNA Computing: New Ideas and Paradigms -- Online Data Structures in External Memory -- From Computational Learning Theory to Discovery Science -- Contributed Papers -- Bounded Depth Arithmetic Circuits: Counting and Closure -- Parametric Temporal Logic for "Model Measuring" -- Communicating Hierarchical State Machines -- Small Pseudo-Random Sets Yield Hard Functions: New Tight Explicit Lower Bounds for Branching Programs -- General Morphisms of Petri Nets (Extended Abstract) -- On Some Tighter Inapproximability Results (Extended Abstract) -- Decomposition and Composition of Timed Automata -- New Applications of the Incompressibility Method (Extended Abstract) -- Mobility Types for Mobile Ambients -- Protein Folding, the Levinthal

Paradox and Rapidly Mixing Markov Chains -- Decidable Fragments of Simultaneous Rigid Reachability -- Text Compression Using Antidictionaries -- Non-interactive Zero-Knowledge: A Low-Randomness Characterization of NP (Extended Abstract) -- Timed Alternating Tree Automata: The Automata-Theoretic Solution to the TCTL Model Checking Problem -- Space-Time Tradeoffs for Graph Properties -- Boundedness of Reset P/T Nets -- Two-way finite state transducers and monadic second-order logic -- Partially Ordered Regular Languages for Graph Queries -- Deciding First-Order Properties of Locally Tree-Decomposable Graphs -- Comparison of Process Algebra Equivalences Using Formats -- Compact Routing Tables for Graphs of Bounded Genus (Extended Abstract) -- Computing LOGCFL Certificates -- Efficient Techniques for Maintaining Multidimensional Keys in Linked Data Structures (Extended Abstract) -- On the Complements of Partial k-Trees -- Approximation Results for Kinetic Variants of TSP -- Distributed Probabilistic Polling and Applications to Proportionate Agreement -- Bisimulation Equivalence Is Decidable for Normed Process Algebra (Extended abstract) -- A Framework for Decidable Metrical Logics -- On the Power of Las Vegas II. Two-Way Finite Automata -- Stable Marriage with Incomplete Lists and Ties -- Average-Case Complexity of Shellsort (Preliminary Version) -- Linear-Time Construction of Two-Dimensional Suffix Trees (Extended Abstract) -- A Connection between the Star Problem and the Finite Power Property in Trace Monoids (Extended Abstract) -- Two Techniques in the Area of the Star Problem -- Approximations by OBDDs and the Variable Ordering Problem -- Simulation Preorder on Simple Process Algebras -- Solos in Concert -- Shortest Anisotropic Paths on Terrains -- Relations between Local and Global Periodicity of Words (Extended Abstract) -- Efficient Merging, Construction, and Maintenance of Evolutionary Trees -- Formalizing a Lazy Substitution Proof System for λ -Calculus in the Calculus of Inductive Constructions -- Leader Election by d Dimensional Cellular Automata -- New Upper Bounds for MaxSat -- Polynomial and Rational Evaluation and Interpolation (with Structured Matrices) ? -- Low Redundancy in Static Dictionaries with $O(1)$ Worst Case Lookup Time -- Finite Automata with Generalized Acceptance Criteria -- A Variant of the Arrow Distributed Directory with Low Average Complexity (Extended Abstract) -- Closed Freyd- and \mathcal{A} -categories -- Typed Exceptions and Continuations Cannot Macro-Express Each Other -- Automata, Power Series, and Coinduction: Taking Input Derivatives Seriously (Extended Abstract) -- Accessing Multiple Sequences Through Set Associative Caches -- $T(A) = T(B)$? -- Many-Valued Logics and Holographic Proofs -- On the Complexity and Inapproximability of Shortest Implicant Problems -- The Wave Propagator Is Turing Computable -- An FPTAS for Agreeably Weighted Variance on a Single Machine (Extended Abstract) -- Erratum: Bulk-Synchronous Parallel Multiplication of Boolean Matrices.
