

1. Record Nr.	UNINA9910143579803321
Autore	Peinado Antonio
Titolo	Speech recognition over digital channels [[electronic resource]] : robustness and standards / / Antonio M. Peinado, Jose C. Segura
Pubbl/distr/stampa	Chichester, England ; ; Hoboken, NJ, : John Wiley, c2006
ISBN	1-280-60598-7 9786610605989 0-470-02472-0 0-470-02401-1
Descrizione fisica	1 online resource (275 p.)
Classificazione	17.46
Altri autori (Persone)	SeguraJose C
Disciplina	006.454 621.384
Soggetti	Automatic speech recognition Signal processing Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [237]-247) and index.
Nota di contenuto	Speech recognition with HMMs -- Networks and degradation -- Speech compression and architectures for RSR -- Robustness against transmission channel errors -- Front-end processing for robust feature extraction -- Standards for distributed speech recognition.
Sommario/riassunto	Automatic speech recognition (ASR) is a very attractive means for human-machine interaction. The degree of maturity reached by speech recognition technologies during recent years allows the development of applications that use them. In particular, ASR shows an enormous potential in mobile environments, where devices such as mobile phones or PDAs are used, and for Internet Protocol (IP) applications. Speech Recognition Over Digital Channels is the first book of its kind to offer a complete system comprehension, addressing the topics of distributed and network-based speech recognition i
