	Disciplina	005.1/15
	Soggetti	Software engineering Computer logic Computer programming Artificial intelligence Logic, Symbolic and mathematical Software Engineering/Programming and Operating Systems Logics and Meanings of Programs Programming Techniques Artificial Intelligence Mathematical Logic and Formal Languages

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Synthesis -- A Formal Framework for Synthesis and Verification of Logic Programs -- Protocols between Programs and Proofs -- Protocols between Programs and Proofs -- A Technique for Modular Logic Program Refinement -- A Technique for Modular Logic Program Refinement -- Transformation -- Higher-Order Transformation of Logic Programs -- Analysis -- Non-transformational Termination Analysis of Logic Programs, Based on General Term-Orderings -- Specialisation -- A Model for Inter-module Analysis and Optimizing Compilation -- Measuring the Effectiveness of Partial Evaluation in Functional Logic Languages -- Automated Strategies for Specializing Constraint Logic Programs -- Abstract Interpretation -- Measuring the Precision of Abstract Interpretations -- Debugging -- Specifying Prolog Trace Models with a Continuation Semantics.
Sommario/riassunto	This volume contains selected papers of LOPSTR2000, the Tenth International 1 Workshop on Logic-based Program Synthesis and Transformation. Inadepture from previous years, LOPSTR2000 constituted the Program Development stream at CL2000, the First International Conference on Computational Logic, held at Imperial College, London, on 24-28 July 2000. This meant that the LOPSTR2000 Program Committee was also the CL2000 Program Committee for Program Development, and as such had the responsibility for all Program Development submissions to CL2000, in addition to the usual LOPSTR abstracts. As a result, there were 18 talks at the workshop, with 2 four papers appearing in the proceedings of CL2000, and 14 abstracts in the 3 LOPSTR2000 pre-proceedings. In this volume we have papers based on ten of the abstracts. So, paradoxically, this volume is slimmer than previous LOPSTR proceedings, whilst this year's Program Committee have had to deal with more submissions and more categories than usual! My heartfelt thanks go to all the members of the Program Committee for their hard and conscientious work in reviewing and selecting the papers at various stages. I would also like to thank all the additional reviewers for their efforts and professionalism. For organizing CL2000, I would like to thank the conference chair Marek Sergot, the program chair John Lloyd, and the local organizers Frank Kriwaczek and Francesca Toni. Their efforts were pivotal for the success of CL2000. Finally, I would like to thank all the authors who submitted papers and all the workshop attendees. Your continued support is crucial to the future of LOPSTR. The next LOPSTR workshop will be held in Cyprus, with ICLP2001 and CP2001. It will mark the tenth anniversary of LOPSTR, so I hope to see many of you there! March 2001 Kung-Kiu Lau 1 http://www.cs.man.ac.uk/~kung-kiu/lopstr 2 J. W. Lloyd, V. Dahl, U. Furbach, M.
