Sommario/riassunto

Global Convict Labour offers a global history of convict labour across many of the regimes of punishment that have appeared from Antiquity to the present, including transportation, prisons, workhouses and labour camps. The editors' essay surveys the available literature, and sets the theoretical basis to approach the issue. The fifteen chapters explore the genealogies of convict labour and its relationships with coloniality and governmentality. The volume re-establishes convict labour firmly within labour history, as one of the entangled, multiple labour relations that have punctuated human history. Similarly, it places convictism back within migration history at large, bridging the gap between the growing literature on convict transportation and research on slavery and other forms of free and bonded migration. Sommario/riassunto	The concept of CAST as Computer Aided Systems Theory, was introduced by F. Pichler in the late 1980s to include those computer theoretical and practical developments as tools to solve problems in System Science. It was considered as the third component (the other two being CAD and CAM) necessary to build the path from Computer and Systems Sciences to practical developments in Science and Engineering. The University of Linz organized the first CAST workshop in April 1988, which demonstrated the acceptance of the concepts by the scientific and technical community. Next, the University of Las Palmas de Gran Canaria joined the University of Linz to organize the first international meeting on CAST, (Las Palmas, February 1989), under the name EUROCAST'89. This was a very successful gathering of systems theorists, computer scientists, and engineers from most European countries, North America, and Japan. It was agreed that EUROCAST international conferences would be organized every two years, alternating between Las Palmas de Gran Canaria and a

continental European location. Thus, successive EUROCAST meetings have taken place in Krems (1991), Las Palmas (1993), Innsbruck (1995), Las Palmas (1997), and Vienna (1999), in addition to an extra-European CAST Conference in Ottawa in 1994.
