1. Record Nr.   UNINA9910143870103321

   Titolo   Modeling and using context : 4th International and Interdisciplinary
                      Conference, CONTEXT 2003, Stanford, CA, USA, June 23-25, 2003 :
                      proceedings / / edited by Patrick Blackburn [and three others]

   Pubbl/distr/stampa Berlin, Germany ; ; New York, New York : , : Springer, , [2003]
                      Â©2003

   ISBN   3-540-44958-2

   Edizione   [1st ed. 2003.]

   Descrizione fisica 1 online resource (536 p.)

   Collana   Lecture Notes in Artificial Intelligence ; ; 2680

   Disciplina   006.3

   Soggetti   Computer simulation
                      Context (Linguistics)

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Note generali   Includes index.

   Nota di bibliografia Includes bibliographical references and index.

   Nota di contenuto Full Papers -- Presupposition Incorporation in Adverbial Quantification
                      -- A Theory of Contextual Propositions for Indicatives -- Context-
                      Sensitive Weights for a Neural Network -- A Common Sense Theory of
                      Causation -- How to Refer: Objective Context vs. Intentional Context
                      -- A SAT-Based Algorithm for Context Matching -- On the Difference
                      between Bridge Rules and Lifting Axioms -- Context Dynamic and
                      Explanation in Contextual Graphs -- A Deduction Theorem for Normal
                      Modal Propositional Logic -- Natural Deduction and Context as
                      (Constructive) Modality -- Communicative Contributions and
                      Communicative Genres: Language Production and Language
                      Understanding in Context -- Explanation as Contextual Categorization
                      -- Effects of Context on the Description of Olfactory Properties --
                      Varieties of Contexts -- Ubi-UCAM: A Unified Context-Aware
                      Application Model -- Contextual Effects on Word Order: Information
                      Structure and Information Theory -- A Generic Framework for Context-
                      Based Distributed Authorizations -- Unpacking Meaning from Words: A
                      Context-Centered Approach to Computational Lexicon Design -- A
                      Contextual Approach to the Logic of Fiction -- Predictive Visual
                      Context in Object Detection -- Copular Questions and the Common
                      Ground -- Contextual Coherence in Natural Language Processing --
                      Local Relational Model: A Logical Formalization of Database

Coordination -- What to Say on What Is Said -- Modelling "but" in Task-Oriented Dialogue -- Dynamic Contextual Intensional Logic: Logical Foundations and an Application -- Comparatively True Types: A Set-Free Ontological Model of Interpretation and Evaluation Contexts -- Discourse Context and Indexicality -- A Mathematical Model for Context and Word-Meaning -- Demonstratives, Reference, and Perception -- Perceiving Action from Static Images: The Role of Spatial Context -- Short Papers -- How to Define the Communication Situation: Determining Context Cues in Mobile Telephony -- How to Use Enriched Browsing Context to Personalize Web Site Access -- Modular Partial Models: A Formalism for Context Representation -- Contextual Modeling Using Context-Dependent Feedforward Neural Nets -- Context-Based Commonsense Reasoning in the DALI Logic Programming Language -- An Ontology for Mobile Device Sensor-Based Context Awareness -- The Use of Contextual Information in a Proactivity Model for Conversational Agents -- GloBuddy, a Dynamic Broad Context Phrase Book -- Exploiting Dynamicity for the Definition and Parsing of Context Sensitive Grammars -- Co-text Loss in Textual Chat Tools -- Context Proceduralization in Decision Making -- GRAVA: An Architecture Supporting Automatic Context Transitions and Its Application to Robust Computer Vision -- Speaking One's Mind -- Connecting Route Segments Given in Route Descriptions.

| Sommario/riassunto | Whetheryouareacomputerscientist,alogician,aphilosopher, orapsychologist, it is crucial to understand the role that context and contextual information plays in reasoning and representation. The conference at which the papers in this volume were presented was the fourth in an international series devoted to research on context, and was held in Stanford (USA) on June 23–25, 2003. The ?rst conference in the series was held in Rio de Janeiro (Brazil) in 1997, the second was held in Trento (Italy) in 1999, and the third was held in Dundee (Scotland, UK) in 2001. CONTEXT2003 brought together representative work from many di?erent ?elds: in this volume you will ?nd philosophical theorizing, logical formalization, computationalmodelling—and,indeed,computationalapplications— together with work that approaches context from a more cognitive orientation. While we don't believe that this volume can capture the lively ?avor of discussion of the conference itself, we do hope that researchers interested in context (in any of its many manifestations) will ?nd something of interest here, perhaps something that will inspire new lines of work. We are very grateful to our invited speakers: Patrick Br´ezillon (University of Paris VI, France), Keith Devlin (CSLI, Stanford), and David Leake (Indiana University, USA) for presenting three important contemporary perspectives on the study on context. |
