Sommario/riassunto

This book presents the thoroughly refereed post-proceedings of a workshop by the Cross-Language Evaluation Forum Campaign, CLEF 2002, held in Rome, Italy in September 2002. The 43 revised full papers presented together with an introduction and run data in an appendix were carefully reviewed and revised upon presentation at the workshop. The papers are organized in topical sections on systems evaluation experiments, cross language and more, monolingual experiments, mainly domain-specific information retrieval, interactive issues, cross-language spoken document retrieval, and cross-language evaluation issues and initiatives.

Sommario/riassunto	Nous avons inventé la fin de vie, au sens où nous avons fabriqué cette question de société et cette période de la vie, qui détermine un nouvel aspect de la condition humaine et s'incarne dans la figure du mourant. Comment faire pour que toute fin de vie demeure une vie pleinement humaine jusqu'à la mort ? Comment négocier les choix de valeurs pluriels des individus, les conditions fabriquées par l'évolution des mœurs et des techniques, et le besoin de règles communes en médecine et en droit ? Cet ouvrage défend la légitimité du pluralisme

sous ses différents aspects épistémique, thérapeutique, politique et éthique.
