

1. Record Nr.	UNINA9910144013503321
Titolo	Advances in enzymology and related areas of molecular biology . Volume 52 [[electronic resource] /] / edited by Alton Meister
Pubbl/distr/stampa	New York, : Wiley, 1981
ISBN	1-282-30111-X 9786612301117 0-470-12297-8 0-470-12376-1
Edizione	[11th ed.]
Descrizione fisica	1 online resource (418 p.)
Collana	Advances in enzymology and related areas of molecular biology ; ; 52
Altri autori (Persone)	MeisterAlton
Disciplina	572 612.0151
Soggetti	Clinical enzymology Enzymes Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	ADVANCES IN ENZYMOLOGY AND RELATED AREAS OF MOLECULAR BIOLOGY; CONTENTS; Interactions of Dinitrogenase and Dinitrogenase Reductase; Glycosyltransferases and Their Use in Assessing Oligosaccharide Structure and Structure-Function Relationships; X-Ray Cryoenzymology; The Role of Futile Cycles in the Regulation of Carbohydrate Metabolism in the Liver; Author Index; Subject Index; Cumulative Index, Vols. 1-52
Sommario/riassunto	Interactions of Dinitrogenase and Dinitrogenase Reductase (D. Emerich, R. Hageman and R. Burris). Glycosyltransferases and Their Use in Assessing Oligosaccharide Structure and Structure-Function Relationships (T. Beyer, J. Sadler, J. Rearick, J. Paulson, and R. Hill). X-Ray Cryoenzymology (A. Fink and G. Petsko). The Role of Futile Cycles in the Regulation of Carbohydrate Metabolism in the Liver (L. Hue). Author and Subject Indexes. Cumulative Index, Vols. 1-52.
