Sommario/riassunto	Through a series of case studies this book brings to the fore the voices, lives, and capacities of people with mental health problems as well as the difficulties they face. It effectively demonstrates the ways people with mental health problems are active in re-scripting versions of social recovery through their use of very different community spaces.; Offers a 'hopeful epistemology' not typically found in mental health-related

research.; Interrogates neo-liberal dogma that defines people with mental health problems as active social citizens wholly responsible for their own recoveries and ac
