

1. Record Nr.	UNINA9910144120003321
Titolo	Arsenic contamination of groundwater [[electronic resource] ] : mechanism, analysis, and remediation / / edited by Satinder Ahuja
Pubbl/distr/stampa	Hoboken, N.J., : Wiley, c2008
ISBN	1-281-83131-X 9786611831318 0-470-37104-8 0-470-36926-4
Descrizione fisica	1 online resource (420 p.)
Altri autori (Persone)	AhujaSatinder <1933->
Disciplina	628.1/6 628.16
Soggetti	Groundwater - Pollution Arsenic - Environmental aspects Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	ARSENIC CONTAMINATION OF GROUNDWATER; CONTENTS; Contributors; Preface; 1 The Problem of Arsenic Contamination of Groundwater; 2 Fate of Arsenic in Irrigation Water and Its Potential Impact on the Food Chain; 3 Microbial Controls on the Geochemical Behavior of Arsenic in Groundwater Systems; 4 Molecular Detection of Dissimilatory Arsenate-Respiring Bacteria in North Carolina Groundwater; 5 Biogeochemical Mechanisms of Arsenic Mobilization and Sequestration; 6 Geomicrobiology of Iron and Arsenic in Anoxic Sediments 7 Development of Measurement Technologies for Low-Cost, Reliable, Rapid, On-Site Determination of Arsenic Compounds in Water 8 Field Test Kits for Arsenic: Evaluation in Terms of Sensitivity, Reliability, Applicability, and Cost; 9 Mucilage of Opuntia ficus-indica for Use as a Flocculant of Suspended Particulates and Arsenic; 10 Prediction of Arsenic Removal by Adsorptive Media: Comparison of Field and Laboratory Studies; 11 Arsenic Remediation of Bangladesh Drinking Water Using Iron Oxide-Coated Coal Ash

12 Development of a Simple Arsenic Filter for Groundwater of Bangladesh Based on a Composite Iron Matrix13 Community-Based Wellhead Arsenic Removal Units in Remote Villages of West Bengal, India; 14 Water Supply Technologies for Arsenic Mitigation; 15 Solutions for Arsenic Contamination of Groundwater; Index

---

Sommario/riassunto

Provides a viable reference, describing the state-of-knowledge on sources of arsenic contamination in ground water, which affects about 100 million people worldwide. With contributions from world-renowned experts in the field, this book explores developments in the transport kinetics, detection, measurement, seasonal cycling, accumulation, geochemistry, removal, and toxicology of arsenic. Includes compelling case studies describing how arsenic contamination occurs and the devastating effects on the people and environment affected by it.
