

1. Record Nr.	UNINA9910144133503321
Autore	Hansen Bernd <1951->
Titolo	Protecting inventions in chemistry : commentary on chemical case law under the European Patent Convention and the German patent law // by Bernd Hansen, Fritjoff Hirsch
Pubbl/distr/stampa	Weinheim ; ; New York, : Wiley-VCH, c1997
ISBN	9786611763923 9781281763921 1281763926 9783527612437 3527612432 9783527612420 3527612424
Descrizione fisica	1 online resource (531 p.)
Altri autori (Persone)	HirschFritjoff
Disciplina	341.7586094 346.0486
Soggetti	Chemicals Patent laws and legislation - Europe Patent laws and legislation - Germany
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Protecting Inventions in Chemistry; Foreword; Contents; Abbreviations; I . The procedure for grant of a patent; A . The patent grant procedure before the EPO; 1 . Overview; 2 . Procedure up to the publication of the application; a) Examination on filing; b) Formalities examination; c) Drawing up the search report; 3 . Unity of the invention; a) Procedural aspects; b) Material aspects; c) Summary; 4 . Publication of the application; 5 . Examination proceedings; a) Examination request; b) Course of the substantive examination proceedings c) Amendments of the application in the examination proceedings6 . National requirements; a) Translation requirements; b) Separate sets of claims; 7 . Overview of important terms and costs; a) Terms for European first filings; b) Terms for European convention filings; c) Costs of an application; B . The patent grant procedure before the GPO;

1 . Overview; 2 . Course of the proceedings; a) Examination as to obvious deficiencies; b) Laying-open of the application; c) Examination on request, in particular substantive examination; (1) Examination request  
 (2) Course of the substantive examination procedure(3) Amendments to the application during the application procedure; (4) Grant; (5) Refusal;  
 3 . Unity of the invention; a) Legal basis; b) Practical handling; (1) Generalities; (2) Intermediate products; (3) Disclaimers; c) Summary; 4 . Separated/Divisional applications; a) Divisional applications; b) Separated applications; 5. Overview of important terms and costs; a) Terms; b) Costs of an application; C . The PCT procedure; 1 . General overview; 2 . International phase; a) Initial and formal examination; b) International search; c) Unity  
 d) Publicatione) International preliminary examination; 3 . National/Regional phase; 4 . Costs; D . Comparison of the possibilities for filing; E . Utility model protection; II . On disclosure and novelty; A . Introduction; B . Requirements of disclosure; 1 . Sufficiency; a) Introduction and legal principles; b) General chemical inventions; c) Biochemical inventions; 2 . Clarity of the claims; a) Functional features in the claim; b) Concentration and substituent data in the claim; c) Product-by-process claims; d) Other parameters in the claim; C . Problems of novelty  
 1 . Introduction -the "state of the art"2 . Formal aspects; a) Prior documentary publication; b) Disclosure through public prior use; (1) Problems of confidence; (2) Problems of disclosure; (a) Processes and uses; (b) Compounds and compositions; c) Disclosure by oral description; d) Earlier published applications and patents; e) Applications with the same priority; f) Non-prejudicial disclosure; 3 . Aspects of content; a) Inclusion of non-expressis verbis disclosure; (1) Decisions of the European Patent Office; (2) Decisions of the Federal Supreme Court and Federal Patent Court  
 b) Novelty of specific subject-matter

## Sommario/riassunto

This book covers the protection of chemical inventions by means of Patents and Utility Models, as well as Supplementary Protection Certificates (SPCs) for medicaments and agrochemicals. The jurisdiction of both the European Patent Office and the relevant German Courts which has been developed in recent decades is presented and explained in a comparative manner. It is the first English edition of a book which has become a standard companion for Patent Practitioners in the field of Chemistry in German speaking countries. The material prerequisites of patentability such as novelty, inventi
