Record Nr. UNINA9910144148503321 Advances in enzymology and related areas of molecular biology. **Titolo** Volume XVIII [[electronic resource] /] / edited by Alton Meister Pubbl/distr/stampa New York, : Wiley, 1957 **ISBN** 1-282-68233-4 9786612682339 0-470-12263-3 0-470-12340-0 Edizione [11th ed.] Descrizione fisica 1 online resource (444 p.) Advances in enzymology and related areas of molecular biology;; 18 Collana Altri autori (Persone) MeisterAlton Disciplina 574.192 612.0151 Soggetti Clinical enzymology **Enzymes** Electronic books. Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Note generali Description based upon print version of record. Nota di bibliografia Includes bibliographical references and index. Nota di contenuto ADVANCES IN ENZYMOLOGY AND RELATED SUBJECTS OF BIOCHEMISTRY; CONTENTS; Cytochrome in Higher Plants; Newer Knowledge of Succinic Dehydrogenase; Mechanism of the Toxicity of the Active Constituent of Dichapetalum cymosum and Related Compounds: Deoxyribonucleoprotein. a Genetic Material: Pyrophosphorylases and Phosphorylases in Biosynthetic Reactions; Le role biosynthetique du cycle des acides tricarboxyliques; Reaction Paths in the Respiration of the Higher Plants; The Chemistry and Function of Lipoic Acid; Lignification; Author Index; Subject Index; Cumulative Indexes of Volumes I-XVIII Sommario/riassunto Advances in Enzymology and Related Areas of Molecular Biology is a seminal series in the field of biochemistry, offering researchers access to authoritative reviews of the latest discoveries in all areas of enzymology and molecular biology. These landmark volumes date back to 1941, providing an unrivaled view of the historical development of enzymology. The series offers researchers the latest understanding of enzymes, their mechanisms, reactions and evolution, roles in complex

biological process, and their application in both the laboratory and industry. Each volume in the series featu
