

1. Record Nr.	UNINA9910144166003321
Titolo	Coastal engineering [[e-journal]]
Pubbl/distr/stampa	Amsterdam, : Elsevier Scientific Pub. Co., 1977-
ISSN	1872-7379
Soggetti	Shore protection Hydraulic engineering Ocean engineering Coastal zone management Periodicals.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Title from contents screen (ScienceDirect, viewed Nov. 14, 2005). "An international journal for coastal, harbour and offshore engineers." Refereed/Peer-reviewed
Sommario/riassunto	"This international journal is indispensable reading for engineers working in the field of marine and coastal technology. Combining practical application with modern technological and scientific achievements, it publishes fundamental studies as well as case histories on the following aspects of coastal, harbour and offshore engineering: studies on waves and currents; coastal morphology; estuary hydraulics; harbour and offshore structures. Mathematical and physical models as well as constructional aspects and environmental problems relating to these items are also included."
