

1. Record Nr.	UNINA9910144187603321
Titolo	Structural, Syntactic, and Statistical Pattern Recognition : Joint IAPR International Workshops, SSPR 2004 and SPR 2004, Lisbon, Portugal, August 18-20, 2004 Proceedings // edited by Ana Fred, Terry Caelli, Robert P.W. Duin, Aurélio Campilho, Dick de Ridder
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2004
ISBN	9783540278680 3-540-27868-0
Edizione	[1st ed. 2004.]
Descrizione fisica	1 online resource (XLII, 1169 p.)
Collana	Lecture Notes in Computer Science, , 0302-9743 ; ; 3138
Disciplina	006.4
Soggetti	Pattern perception Computer science—Mathematics Artificial intelligence Computer graphics Optical data processing Pattern Recognition Discrete Mathematics in Computer Science Artificial Intelligence Computer Graphics Image Processing and Computer Vision
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Invited Talks -- SSPR -- Poster Papers -- SPR -- Poster Papers.
Sommario/riassunto	This volume contains all papers presented at SSPR 2004 and SPR 2004, hosted by the Instituto de Telecomunicacões/Instituto Superior Técnico, Lisbon, Portugal, August 18–20, 2004. This was the fourth time that the two workshops were held back-to-back. The SSPR was the tenth International Workshop on Structural and Synt- tic Pattern Recognition, and the SPR was the 7th International Workshop on Statistical Techniques in Pattern Recognition. These workshops have traditi- ally been held in conjunction with ICPR (International

Conference on Pattern Recognition), and are the major events for technical committees TC2 and TC1, respectively, of the International Association for Pattern Recognition (IAPR). The workshops were closely coordinated, being held in parallel, with plenary talks and a common session on hybrid systems. This was an attempt to resolve the dilemma of how to deal with the need for narrow-focus specialized workshops yet accommodate the presentation of new theories and techniques that blur the distinction between the statistical and the structural approaches. A total of 219 papers were received from many countries, with the submission and reviewing processes being carried out separately for each workshop. A total of 59 papers were accepted for oral presentation and 64 for posters. In addition, four invited speakers presented informative talks and overviews of their research. They were: Alberto Sanfeliu, from the Technical University of Catalonia, Spain; Marco Gori, from the University of Siena, Italy; Nello Cristianini, from the University of California, USA; and Erkki Oja, from Helsinki University of Technology, Finland, winner of the 2004 Pierre Devijver Award.
