

1. Record Nr.	UNINA9910144188803321
Titolo	Grid and Cooperative Computing : Second International Workshop, GCC 2003 Shanghai, China, December 7-10, 2003 Revised Papers, Part I // edited by Minglu Li, Xian-He Sun, Qianni Deng, Jun Ni
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2004
ISBN	1-280-30794-3 9786610307944 3-540-24679-7
Edizione	[1st ed. 2004.]
Descrizione fisica	1 online resource (LXXIV, 1114 p.)
Collana	Lecture Notes in Computer Science, , 0302-9743 ; ; 3032
Disciplina	004.36
Soggetti	Computers Computer communication systems Operating systems (Computers) Software engineering Application software Information storage and retrieval Theory of Computation Computer Communication Networks Operating Systems Software Engineering Information Systems Applications (incl. Internet) Information Storage and Retrieval
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Vega Grid: A Computer Systems Approach to Grid Research -- Session 1: Grid Application -- Session 2: Peer to Peer Computing -- Session 3: Grid Architectures -- Session 4: Grid Middleware and Toolkits -- Session 5: Web Security and Web Services.
Sommario/riassunto	Grid and cooperative computing has emerged as a new frontier of information tech-logy. It aims to share and coordinate distributed and

heterogeneous network resources for better performance and functionality that can otherwise not be achieved. This volume contains the papers presented at the 2nd International Workshop on Grid and Cooperative Computing, GCC 2003, which was held in Shanghai, P.R. China, during December 7–10, 2003. GCC is designed to serve as a forum to present current and future work as well as to exchange research ideas among researchers, developers, practitioners, and users in Grid computing, Web services and cooperative computing, including theory and applications. For this workshop, we received over 550 paper submissions from 22 countries and regions. All the papers were peer-reviewed in depth and qualitatively graded on their relevance, originality, significance, presentation, and the overall appropriateness of their acceptance. Any concerns raised were discussed by the program committee. The organizing committee selected 176 papers for conference presentation (full papers) and 173 submissions for poster presentation (short papers). The papers included herein represent the forefront of research from China, USA, UK, Canada, Switzerland, Japan, Australia, India, Korea, Singapore, Brazil, Norway, Greece, Iran, Turkey, Oman, Pakistan and other countries. More than 600 attendees participated in the technical section and the exhibition of the workshop.
