ISBN	1-280-47030-5 0-19-993885-7 0-19-802767-2 1-60256-230-X
Descrizione fisica	1 online resource (368 p.)
Collana	Library of Latin America Free pages and other essays
Disciplina	861/.5 868.508
Soggetti	Spanish literature Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliography.
Nota di contenuto	Contents; Series Editors' General Introduction; Criteria for This Edition; Biographical Note on Manuel Gonzalez Prada; Chronology of Manuel Gonzalez Prada; Introduction; Selected Bibliography; About the Editor and Translator; Free Pages and Other Essays: Anarchist Musings; Contents; I: Free Pages; II: Times of Struggle; III: New Free Pages; IV: Diogenes' Cask; V: Anarchy; VI: Under Opprobrium
Sommario/riassunto	Manuel Gonzalez Prada was a powerful Peruvian writer and political reformer whose essays and speeches influenced generations of young radicals. He founded the Party of National Unity in 1891, was linked to the anarchist movement, and served as Director of the National Library from 1912-1914. His writings have had enormous impact on the literary and political life of Peru: taking up the defense of exploited indigenous people, broadsiding the landowning oligarchy, and denouncing the social and political errors of the country. In fact, the radical politics Prada advocated then are still alive and

2. Record Nr.	UNISA996465522803316
Titolo	Engineering Secure Software and Systems : Second International Symposium, ESSoS 2010, Pisa, Italy, February 3-4, 2010, Proceedings / / edited by Fabio MASSACCI, Dan Wallach, Nicola Zannone
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2010
ISBN	1-280-38563-4 9786613563552 3-642-11747-3
Edizione	[1st ed. 2010.]
Descrizione fisica	1 online resource (X, 241 p.)
Collana	Security and Cryptology ; ; 5965
Classificazione	SS 4800
Disciplina	005.8
Soggetti	Computer communication systems Software engineering Data encryption (Computer science) Data structures (Computer science) Computer science—Mathematics Computers Computer Communication Networks Software Engineering/Programming and Operating Systems Cryptology Data Structures and Information Theory Math Applications in Computer Science Models and Principles Kongress. Pisa (2010)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Session 1. Attack Analysis and Prevention I -- BuBBle: A Javascript Engine Level Countermeasure against Heap-Spraying Attacks -- CsFire: Transparent Client-Side Mitigation of Malicious Cross-Domain Requests -- Idea: Opcode-Sequence-Based Malware Detection -- Session 2. Attack Analysis and Prevention II -- Experiences with PDG-

Based IFC -- Idea: Java vs. PHP: Security Implications of Language Choice for Web Applications -- Idea: Towards Architecture-Centric Security Analysis of Software -- Session 3. Policy Verification and Enforcement I -- Formally-Based Black-Box Monitoring of Security Protocols -- Secure Code Generation for Web Applications -- Idea: Reusability of Threat Models -- Two Approaches with an Experimental Evaluation -- Session 4. Policy Verification and Enforcement II -- Model-Driven Security Policy Deployment: Property Oriented Approach -- Category-Based Authorisation Models: Operational Semantics and Expressive Power -- Idea: Efficient Evaluation of Access Control Constraints -- Session 5. Secure System and Software Development I -- Formal Verification of Application-Specific Security Properties in a Model-Driven Approach -- Idea: Enforcing Consumer-Specified Security Properties for Modular Software -- Idea: Using System Level Testing for Revealing SQL Injection-Related Error Message Information Leaks -- Session 6. Secure System and Software Development II -- Automatic Generation of Smart, Security-Aware GUI Models -- Report: Modular Safeguards to Create Holistic Security Requirement Specifications for System of Systems -- Idea: A Feasibility Study in Model Based Prediction of Impact of Changes on System Quality.

Sommario/riassunto

This book constitutes the refereed proceedings of the Second International Symposium on Engineering Secure Software and Systems, ESSoS 2010, held in Pisa, Italy, in February 2010. The 9 revised full papers presented together with 8 ideas papers were carefully reviewed and selected from 58 submissions. The papers are organized in topical sections on attack analysis and prevention, policy verification and enforcement, and secure system and software development.

3. Record Nr.	UNINA9910144193303321
Titolo	Recent Advances in Constraints : Joint ERCIM/CoLogNET International Workshop on Constraint Solving and Constraint Logic Programming, CSCLP 2003, Budapest, Hungary, June 30 - July 2, 2003, Selected Papers // edited by Krzysztof R. Apt, Francois Fages, Francesca Rossi, Peter Szeredi, Josef Vancza
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2004
ISBN	1-280-30733-1 9786610307333 3-540-24662-2
Edizione	[1st ed. 2004.]
Descrizione fisica	1 online resource (VIII, 288 p.)
Collana	Lecture Notes in Artificial Intelligence ; ; 3010
Disciplina	005.11
Soggetti	Software engineering Artificial intelligence Computer industry Computer programming Programming languages (Electronic computers) Computer logic Software Engineering/Programming and Operating Systems Artificial Intelligence The Computer Industry Programming Techniques Programming Languages, Compilers, Interpreters Logics and Meanings of Programs
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Constraint Solving -- A Comparative Study of Arithmetic Constraints on Integer Intervals -- Clustering for Disconnected Solution Sets of Numerical CSPs -- Implementing Propagators for Tabular Constraints -- Constraint Methods for Modal Satisfiability -- Learning Approximate

Consistencies -- Soft Constraints -- Abstracting Soft Constraints: Some Experimental Results on Fuzzy CSPs -- Tradeoff Generation Using Soft Constraints -- Experimental Evaluation of Interchangeability in Soft CSPs -- Language Issues -- A Rule Language for Interaction -- A Generic Trace Schema for the Portability of CP(FD) Debugging Tools -- Applications -- Teaching Constraints through Logic Puzzles -- Reduce-To-The-Opt -- A Specialized Search Algorithm for Contiguous Task Scheduling -- A New Approach to Modeling and Solving Minimal Perturbation Problems -- Protein Folding in CLP() with Empirical Contact Energies -- Gestures for Embodied Agents with Logic Programming.

Sommario/riassunto

Constraint programming is the fruit of several decades of research carried out in mathematical logic, automated deduction, operations research and artificial intelligence. The tools and programming languages arising from this research ?eld have enjoyed real success in the industrial world as they contribute to solving hard combinatorial problems in diverse domains such as production planning, communication networks, robotics and bioinformatics. This volume contains the extended and reviewed versions of a selection of papers presented at the Joint ERCIM/CoLogNET International Workshop on Constraint Solving and Constraint Logic Programming (CSCLP2003), which was held from June 30 to July 2, 2003. The venue chosen for the seventh edition of this annual workshop was the Computer and Automation Research Institute of the Hungarian Academy of Sciences (MTA SZTAKI) in Budapest, Hungary. This institute is one of the 20 members of the Working Group on Constraints of the European Research Consortium for Informatics and Mathematics (ERCIM). For many participants this workshop provided the first opportunity to visit their ERCIM partner in Budapest. CoLogNET is the European-funded network of excellence dedicated to supporting and enhancing cooperation and research on all areas of computational logic, and continues the work done previously by the Compulog Net. In particular, the aim of the logic and constraint logic programming area of CoLogNET is to foster and support all research activities related to logic programming and constraint logic programming. The editors would like to take the opportunity and thank all the authors who submitted papers to this volume, as well as the reviewers for their helpful work.
