

1. Record Nr.	UNINA9910144270803321
Autore	Skripov V. P (Vladimir Pavlovich)
Titolo	Crystal-liquid-gas phase transitions and thermodynamic similarity [[electronic resource] /] / Vladimir P. Skripov and Mars Z. Faizullin
Pubbl/distr/stampa	Weinheim, : Wiley-VCH, c2006
ISBN	1-280-72300-9 9786610723003 3-527-60805-2 3-527-60752-8
Descrizione fisica	1 online resource (186 p.)
Altri autori (Persone)	FaizullinMars Z
Disciplina	530.414
Soggetti	Phase transformations (Statistical physics) Thermodynamics Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Liquid-gas phase transitions -- Crystal-liquid phase transitions -- Phase transitions in solutions.
Sommario/riassunto	Professor Skripov obtained worldwide recognition with his monograph ""Metastable liquids"", published in English by Wiley & Sons. Based upon this work and another monograph published only in Russia, this book investigates the behavior of melting line and the properties of the coexisting crystal and liquid phase of simple substances across a wide range of pressures, including metastable states of the coexisting phases. The authors derive new relations for the thermodynamic similarity for liquid-vapour phase transition, as well as describing solid-liquid, liquid-vapor and liquid-liquid pha
