

1. Record Nr.	UNINA9910144285203321
Autore	Detty Michael R. <1951->
Titolo	Tellurium-containing heterocycles [[electronic resource] /] / Michael R. Detty and (in part) Marie B. O'Regan
Pubbl/distr/stampa	New York, : Wiley, c1994
ISBN	1-282-30642-1 9786612306426 0-470-18793-X 0-470-18892-8
Descrizione fisica	1 online resource (526 p.)
Collana	The Chemistry of heterocyclic compounds ; ; v. 53
Altri autori (Persone)	O'ReganMarie B
Disciplina	547.59 547/.59 547/.59/05
Soggetti	Organotellurium compounds Heterocyclic compounds Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"An Interscience publication."
Nota di bibliografia	Includes bibliographical references (p. 488-490) and index.
Nota di contenuto	TELLURIUM-CONTAINING HETEROCYCLES; Contents; I. Tellurium-Containing Heterocycles: Reviews, Distinguishing Features, and Utility; II. Tellurophenes, Dihydrotellurophenes, and Tetrahydrotellurophenes and Their Benzo and Dibenzo Analogs; III. Telluranes, Tellurins, and Other Six-Membered Rings Containing One Tellurium Atom; IV. Telluropyrylium Compounds; V. Tellurium-Containing Heterocycles with at Least One Group Va Element (Nitrogen, Phosphorus, or Arsenic) VI. Tellurium-Containing Heterocycles Composed of Group IVa (Carbon, Silicon, Germanium, and Tin) and Group VIa Elements (Tellurium, Selenium, Sulfur, and Oxygen)VII. Tellurium-Containing Heterocycles as Donor Molecules; VIII. Tellurium-Containing Heterocycles with Hypervalent or Coordination Bonds to Tellurium; INDEX
Sommario/riassunto	Tellurium-Containing Heterocycles: Reviews, Distinguishing Features, and Utility. Tellurophenes, Dihydrotellurophenes, and Tetrahydrotellurophenes and Their Benzo and Dibenzo Analogs. Telluranes, Tellurins, and Other Six-Membered Rings Containing One

Tellurium Atom. Telluropyrylium Compounds. Tellurium-Containing Heterocycles with at Least One Group Va Element (Nitrogen, Phosphorus, or Arsenic). Tellurium-Containing Heterocycles Composed of Group IVa (Carbon, Silicon, Germanium, and Tin) and Group VIa Elements (Tellurium, Selenium, Sulfur, and Oxygen). Tellurium-Containing Heterocycles as Dono
