

1. Record Nr.	UNINA9910144314803321
Titolo	Inorganic syntheses . Volume XIII // editor-in-chief, F.A. Cotton
Pubbl/distr/stampa	New York, : McGraw Hill, 1971
ISBN	9786612305511 9781282305519 1282305514 9780470132449 0470132442 9780470132791 0470132795
Descrizione fisica	1 online resource (288 p.)
Collana	Inorganic syntheses ; ; 13
Altri autori (Persone)	CottonF. Albert <1930-2007.> (Frank Albert)
Disciplina	541.39 541/.39
Soggetti	Inorganic compounds - Synthesis Chemistry, Inorganic
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and and index.
Nota di contenuto	INORGANIC SYNTHESSES; CONTENTS; Preface; Notice to Contributors; Chapter One COMPOUNDS OF THE NONTRANSITION ELEMENTS; 1. Perbromic Acid and Potassium Prebromate; 2. a-Sulfanuric Chloride-Cyclic Trimer; A. (Trichlorophosphoranylidene)sulfamoyl Chloride; B. a-Sulfanuric Chloride-Cyclic Trimer; 3. Arsine and Arsine-d3; 4. Ammonium Cyanate; 5. Phosphorus(III) Isocyanate; 6. Phosphoramidic Acid and Its Salts; A. Ammonium Hydrogen Phosphoramidate; B. Phosphoramidic Acid; C. Potassium Hydrogen Phosphoramidate; 7. Diphenyl(trimethylsilyl)phosphine and Dimethyl(trimethylsilyl)phosphine A. Diphenyl(trimethylsilyl)phosphineB. Dimethyl(trimethylsilyl)phosphine; 8. Exchange Reactions for the Syntheses of Phenylboron Chlorides and Tetrafluoromethylphosphorane; A. Dichloro(phenyl)borane, C6H5BCl2; B. Chlorodiphenylborane, (C6H5)2BCl; C. Tetrafluoromethylphosphorane, CH3PF4; 9. 2,4,6-Trichloroborazine; 10. 2,4,6-Trichloro-1,3,5-trimethylboraeine; Chapter Two

ORGANOMETALLIC COMPOUNDS; 11. Cyclic-diolefin Complexes of Platinum and Palladium; A. Platinum Compounds; B. Palladium Compounds; 12. Cationic Diene Complexes of Palladium(II) and Platinum(II); A. Complexes of Type (I) B. Complexes of Type (II) C. Complexes of Type (III); D. Complexes of Type (IV); 13. Trichloro-, Trimethyl-, and Trifluorosilylcobalt Tetracarbonyl; A. Tetracarbonyl(trichlorosilyl)cobalt; B. Tetracarbonyl(trimethylsilyl)cobalt; C. Tetracarbonyl(trifluorosilyl)cobalt; 14. Isoleptic Allyl Derivatives of Various Metals; A. Allyl Magnesium Chloride; B. Tetraallylstannane; C. Tetraallylsilane and Tetraallylgermane; D. Tri- η^3 -allylchromium; E. Di- η^3 -allylnickel; Chapter Three COMPOUNDS CONTAINING METAL-TO- METAL BONDS; 15. Rhenium and Molybdenum Compounds Containing Quadruple Bonds A. Octahalodirhenate(III) Anions B. Tetrakis(carboxylato)dihalodirhenium(III) Compounds; C. Tetrakis(carboxylato)dimolybdenum(II) Compounds; 16. Tetrakis(acetato)dirhodium(II) and Similar Carboxylato Compounds; 17. Dodecacarbonyltriruthenium and -triosmium; A. Dodecacarbonyltriruthenium; B. Dodecacarbonyltriosmium; 18. Dodecacarbonyltetrairidium; 19. Disodium Hexaalkoxy-octa- η^3 -chloro-hexamolybdates; A. Disodium Octa- η^3 -chloro-hexaniethoxyhexamolybdate(II); B. Disodium Octa- η^3 -chloro-hexaethoxyhexamolybdate(II); C. Disodium Octa- η^3 -chloro-hexamolybdate(II) Chapter Four PHOSPHINE AND PHOSPHITE COMPLEXES OF LOW-VALENT METALS 20. Triaryl Phosphite Complexes of Cobalt, Nickel, Platinum, and Rhodium; A. Hydridotetrakis(triphenyl phosphite)cobalt(I); B. Tetrakis(triphenyl phosphite)nickel(0); C. Tetrakis(triphenyl phosphite)platinum(0); D. Hydridotetrakis(triphenyl phosphite)rhodium(I); 21. Tetrakis(triethyl phosphite)nickel(0), Palladium(0), and Platinum(0) Complexes; A. Tetrakis(triethyl phosphite)nickel(0); B. Tetrakis(triethyl phosphite)palladium(0); C. Tetrakis(triethyl phosphite)platinum(0); D. Tetrakis(triphenyl phosphite)nickel(0) 22. Low-valent Metal Complexes of Diethyl Phenylphosphonite

Sommario/riassunto

The volumes in this continuing series provide a compilation of current techniques and ideas in inorganic synthetic chemistry. Includes inorganic polymer syntheses and preparation of important inorganic solids, syntheses used in the development of pharmacologically active inorganic compounds, small-molecule coordination complexes, and related compounds. Also contains valuable information on transition organometallic compounds including species with metal-metal cluster molecules. All syntheses presented here have been tested.
