

1. Record Nr.	UNINA9910144339803321
Titolo	Software Security - Theories and Systems : Second Mext-WSF-JSPS International Symposium, ISSS 2003, Tokyo, Japan, November 4-6, 2003 // edited by Kokichi Futatsugi, Fumio Mizoguchi, Naoki Yonezaki
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2004
ISBN	3-540-37621-6
Edizione	[1st ed. 2004.]
Descrizione fisica	1 online resource (VIII, 348 p.)
Collana	Lecture Notes in Computer Science, , 0302-9743 ; ; 3233
Disciplina	005.8
Soggetti	Application software Computer networks Operating systems (Computers) Data encryption (Computer science) Programming languages (Electronic computers) Computers Computer Applications Computer Communication Networks Operating Systems Cryptography Programming Languages, Compilers, Interpreters Theory of Computation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	1: Analysis of Protocols and Cryptography -- Verifying Confidentiality and Authentication in Kerberos 5 -- A Cost Estimation Calculus for Analyzing the Resistance to Denial-of-Service Attack -- Formal Analysis of the NetBill Electronic Commerce Protocol -- Inferences on Honesty in Compositional Logic for Protocol Analysis -- A Formal System for Analysis of Cryptographic Encryption and Their Security Properties -- 2: Verification of Security Properties -- Formal Specification and Verification of Resource Bound Security Using PVS -- Java Program Verification at Nijmegen: Developments and Perspective

-- Decision Procedures for Several Properties of Reactive System Specifications -- A Model for Delimited Information Release -- 3: Safe Implementation of Programming Languages -- The Interface Definition Language for Fail-Safe C -- Lightweight Wrappers for Interfacing with Binary Code in CCured -- 4: Secure Execution Environments -- Detecting Unknown Computer Viruses – A New Approach – -- Security Policy Descriptions Through the Use of Control Structure of a Target Program -- Securing RPC with a Reference Monitor for System Calls -- UML Scrapbook and Realization of Snapshot Programming Environment -- 5: Secure Systems and Security Management -- Managing Information Technology Security Risk -- SEAS: A Secure E-Voting Applet System -- The Design of a Secure Distributed Devices System Based on Immunity.

Sommario/riassunto

Following the success of the International Symposium on Software Security 2002 (ISSS 2002), held in Keio University, Tokyo, November, 2002, ISSS 2003 was held in the Tokyo Institute of Technology, Tokyo, on November 4–6, 2003. This volume is the collection of the papers that were presented at ISSS 2003. The proceedings of ISSS 2002 was published as LNCS 2609. Although the security and reliability of software systems for networked computer systems are major concerns of current society, the technology for software security still needs to be developed in many directions. Similar to ISSS 2002, ISSS 2003 aimed to provide a forum for research discussions and exchanges among world-leading scientists in the fields of both theoretical and systems aspects of security in software construction. The program of ISSS 2003 was a combination of invited talks and selected research contributions. It included the most recent visions and researches of the 9 invited speakers, as well as 11 contributions of researches funded by the MEXT grant-in-aid for scientific research on the priority area “Implementation Scheme for Secure Computing” (AnZenKaken). We collected the original contributions after their presentation at the symposium and began a review procedure that resulted in the selection of the papers in this volume. They appear here in final form. ISSS 2003 required a lot of work that was heavily dependent on members of the program committee, and staffs and graduate students who participated in AnZenKaken. We sincerely thank them for their efforts and time.
