**Sommario/riassunto**

Church-state relations have always been important but the need for an historical re-evaluation has been heightened by recent developments in the relations between governments and religious bodies. Drawing on a wide range of historical case-studies this book focuses particularly on the way in which the traditional European Old World fusion of church and state was reshaped in the New World of European settler colonies of the United States, Australia and New Zealand. Its analysis illuminates both the historical dynamics of such changes and the way in which such developments continue to influence the conduct of church-state relations in both the Old and the New Worlds.

## Sommario/riassunto

This tutorial book presents seven revised lectures given by leading researchers at the 4th International School on Functional Programming, AFP 2002, in Oxford, UK in August 2002. The lectures presented introduce tools, language features, domain-specific languages, problem domains, and programming methods. All lectures contain exercises and practical assignments. The software accompanying the lectures can be accessed from the AFP 2002 Web site. This book is designed to enable individuals, small groups of students, and lecturers to study recent work in the rapidly developing area of functional programming.
