Nota di contenuto	Introduction and overview of the book -- Presentation, diagnosis and classification of diabetes -- Health assessment, management targets, and deciding on a management plan -- Nutritional management and physical activity -- Pharmacotherapeutic management -- Short-term complications -- Long-term complications -- Psychological issues and quality of life -- Diabetes education -- Gestational diabetes -- Complementary and alternative therapies.
Sommario/riassunto	The incidence and prevalence of diabetes is increasing globally, and most health professionals are likely to care for people with diabetes. In such cases they may often find that they have to make clinical decisions without expert support, which can be difficult for both patient and carer. Managing Clinical Problems in Diabetes provides this support by exploring common clinical problems in diabetes care, and providing practical solutions based on evidence and the clinical experience of diabetes educators, endocrinologists, general practitioners, and other health professionals who encoun
