

1. Record Nr.	UNINA9910144675003321
Titolo	Ciba Foundation Symposium on Haemopoiesis [[electronic resource]] : cell production and its regulation // editors for the Ciba Foundation, G. E.W. Wolstenholme and Maeve O'Connor
Pubbl/distr/stampa	Boston, : Little, Brown, [1960?]
ISBN	1-280-76848-7 9786613679253 0-470-71919-2 0-470-71670-3
Descrizione fisica	1 online resource (516 p.)
Collana	Ciba Foundation symposium
Altri autori (Persone)	WolstenholmeG. E. W (Gordon Ethelbert Ward) O'ConnorMaeve
Disciplina	612.11
Soggetti	Hematopoiesis Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Haemopoiesis Cell Production and its Regulation; Contents; The lymphomyeloid complex; Discussion; Radioisotopes in the study of blood cell formation with special reference to lymphocytopoiesis; Discussion; The use of tritiated thymidine in the study of haemopoietic cell proliferation; Discussion; Differentiation, proliferation and maturation of haemopoietic cells studied in tissue culture; Discussion; Cell transfusion and its significance in relation to blood cell formation; Discussion; Models for lymphocyte and plasmocyte formation; Discussion Quantitative investigations on the lymphomyeloid system in thymectomized rats Discussion; On the destination of thymus lymphocytes; Discussion; Production and distribution of granulocytes and the control of granulocyte release; Short communication Radiation effects on neutrophil balance; Discussion; Short communication The mobilization of vitamin B ₁₂ in response to acute blood loss; Discussion; Studies on the kinetics of erythropoiesis: a model of the erythron; Discussion; Humoral influences on blood cell formation and release;

Discussion; Factors in the control of haemopoiesis; Discussion
Sources and properties of human urinary erythropoietin Discussion;
Transfusion-induced polycythaemia as a model for studying factors
influencing erythropoiesis; Discussion; General Discussion
