

1. Record Nr.	UNINA9910144698003321
Titolo	Applications and systematics of bacillus and relatives [[electronic resource] /] / edited by Roger Berkeley ... [et al.]
Pubbl/distr/stampa	Malden, Mass., : Blackwell Science, 2002
ISBN	1-282-34167-7 9786612341670 0-470-69674-5 0-470-69521-8
Descrizione fisica	1 online resource (332 p.)
Altri autori (Persone)	BerkeleyR. C. W
Disciplina	579.362
Soggetti	Bacillus (Bacteria) Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Applications and Systematics of Bacillus and Relatives; Contents; List of Contributors; Foreword; 1 Whither Bacillus?; 2 From Phylogeny to Systematics: the dissection of the genus Bacillus; 3 Longstanding Taxonomic Enigmas within the 'Bacillus cereus group' are on the Verge of being Resolved by Far-reaching Molecular Developments: forecasts on the possible outcome by an ad hoc team; 4 Bacillus cereus and Food Poisoning; 5 Thermophilic Bacillus Isolates from Antarctic Environments; 6 Bacilli Associated with Spoilage in Dairy Products and Other Food 7 Moderately Halophilic and Halotolerant Species of Bacillus and Related Genera 8 Bacillus Identification - Traditional Approaches; 9 Modern Methods for Identification; 10 Nucleic Acid Analysis and SDS-PAGE of Whole-cell Proteins in Bacillus Taxonomy; 11 Bacillus thuringiensis Insecticides; 12 Bt Crops: a novel insect control tool; 13 Bacillus sphaericus and its Insecticidal Toxins; 14 The Importance of Bacillus Species in the Production of Industrial Enzymes; 15 Plant Growth Promotion by Bacillus and Relatives; 16 Insertion Sequence Elements and Transposons in Bacillus 17 Fingerprint Spectrometry Methods in Bacillus Systematics 18 Whole-

cell Fatty Acid Analysis in the Systematics of Bacillus and Related Genera; 19 Some Concluding Observations; Index

Sommario/riassunto

Inspired by the pace of change in the taxonomy of the aerobic endospore-forming bacteria, the "Bacillus 2000" symposium on which this book is based was held in Bruges, Belgium, in August 2000, and was supported by the Federation of European Microbiological Societies, the Belgian Society for Microbiology, and several commercial sponsors. Bringing taxonomists interested in Bacillus and its relatives together with people who work with these organisms in medicine, agriculture, and industry, allowed those attending to appreciate the overlaps and interactions of their areas of expertise, in the ab
