Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Contain articles from Symposium on Dietary supplement and health, held at the Novartis Foundation, London, 9-11, 2006.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Dietary Supplements And Health; Contents; Chair's introduction; Risk assessment of dietary supplements; DISCUSSION; Setting dietary intake levels: problems and pitfalls; DISCUSSION; Criteria for substantiating claims; DISCUSSION; Science in the regulatory setting: a challenging but incompatible mix?; DISCUSSION; Vitamin E; DISCUSSION; Flavonoids: a re-run of the carotenoids story?; DISCUSSION; Reduced folate status is common and increases disease risk. It can be corrected by daily ingestion of supplements or fortification; DISCUSSION; Calcium and vitamin D; DISCUSSION; Selenium; DISCUSSION Herbal medicines: balancing benefits and risksDISCUSSION; Standardization and evaluation of botanical mixtures: lessons from a traditional Chinese herb, Epimedium, with oestrogenic properties; DISCUSSION; Communication between science and management; DISCUSSION; Dietary supplements and health: the research agenda; DISCUSSION; FINAL DISCUSSION; Index of Contributors; Subject Index
Sommario/riassunto	Dietary supplements can contain a wide variety of ingredients, either singly or in combination, including nutrients, botanicals and 'bioactive

components' commonly found in foods. They are marketed and used by consumers for a range of reasons: to enhance "well-being", as traditional medicines, for health promotion or disease risk reduction, and as alternatives or complements to conventional drug therapies. On a global basis, the dietary supplement industry has enjoyed rapid growth, becoming a multi-billion dollar enterprise over the last 10 years. This growth has been associated with signifi

Sommario/riassunto	First published in 1997, this book addresses the question: What is the interpretation of English there -existential construction? One of the principal goals is to develop an interpretation for the construction that will specifically address other properties of the postcopular DP. After outlining the problem, the author goes on to present a syntactic motivation for the claim that the postcopular DP is the sole complement to the existential predicate, as well as for the claim that the optional final phrase is a predictive adjunct. In chapter 3 the interpretation for the basic existential construction is developed and then compared to analyses that take the postcopular DP to denote an ordinary individual or a generalised quantifier of individuals. This analysis is then augmented to account for the contribution of the final XP and shows how the predicate restriction can be derived from a more general condition on depictive/circumstantial VP-adjuncts. The final chapter contain some speculative discussion of the broader implications of the proposal in the context of data such as "list" existential and "presentational- there" sentences.
