Descrizione fisica	1 online resource (293 p.)
Collana	Ciba Foundation symposium ; ; 187
Altri autori (Persone)	Frazerl. H (Ian H.)
Disciplina	616.99 616.992061
Soggetti	Viral carcinogenesis Viral vaccines Cancer - Immunotherapy Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Ciba Foundation"--Cover. Symposium held at the Ciba Foundation, London, 15-17 March 1994, based on a proposal by Ian Frazer.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	VACCINES AGAINST VIRALLY INDUCED CANCERS; Contents; Participants; Introduction; Potential antigenic targets on Epstein - Barr virus-associated tumours and the host response; The host response to lesions induced by human papillomavirus; General discussion I; Human T cell lymphotropic virus: necessity for and feasibility of a vaccine; Vaccination against cutaneous and mucosal papillomavirus in cattle; Strategies for studying mouse and human immune responses to human papillomavirus type 16 Prospects for T cell immunotherapy of tumours by vaccination with immunodominant and subdominant peptidesHepatitis B virus infection, the immune response and hepatocellular carcinoma; The role of superantigens in the immunobiology of retroviruses; General discussion II; Assembly and transport of class I MHC-peptide complexes; Induction and regulation of CD4+ T cell subsets; Propagation of mouse and human T cells with defined antigen

specificity and function; Immunity to the HER-2neu oncogenic protein
Genetic modification of T cell clones to improve the safety and efficacy
of adoptive T cell therapy
Bone marrow-derived cells present MHC class
I-restricted tumour antigens in priming of antitumour immune
responses; Evasion of host immune responses by tumours and viruses;
Final discussion; Index of contributors; Subject index

Sommario/riassunto

An interdisciplinary and multinational group of specialists present
contributions describing the current status of vaccines against virally
induced tumors and discuss the means by which they can be improved.

Genome analysis -- Systems biology -- Computational proteomics --
Machine and deep learning -- Data analysis and methodology.

Sommario/riassunto

This book constitutes the proceedings of the 15th International Symposium on Bioinformatics Research and Applications, ISBRA 2019, held in Barcelona, Spain, in June 2019. The 22 full papers presented in this book were carefully reviewed and selected from 95 submissions. They were organized in topical sections named: genome analysis; systems biology; computational proteomics; machine and deep learning; and data analysis and methodology.

Frontmatter -- Preface -- Contents of volume I -- I. Introduction -- II. Afrotheria -- III. Xenarthra -- IV. Euarchontoglires -- Index

The Handbook of Zoology aims to provide an in depth treatment of the entire animal kingdom from the lower invertebrates to the mammals. It publishes comprehensive overviews on animal systematics and morphology as well as extensive coverage of physiology, behaviour, ecology and applied aspects of zoological research. Volumes in progress include Nemathelminthes and Gnathifera, Annelida, Mollusca, Arthropoda, Arthropoda: Insecta, and Mammalia. Although our knowledge regarding many taxonomic groups has grown enormously over the last decades, it is still the ambition of the Handbook to be comprehensive in the sense that text and references together provide a

solid basis for further research. Editors and authors seek a balance between describing species richness and diversity, explaining the importance of certain groups in a phylogenetic context and presenting a review of available knowledge and up-to-date reference literature. New contributions to the series present the combined effort of an international team of editors and authors, entirely published in English and explicitly addressing the international scientific community. This volume of the series Handbook of Zoology deals with the anatomy of the gastrointestinal digestive tract - stomach, small intestine, caecum and colon - in all eutherian orders and suborders. It presents compilations of anatomical studies
