

1. Record Nr.	UNINA9910144736403321
Titolo	Vaccines against virally induced cancers [[electronic resource]]
Pubbl/distr/stampa	Chichester ; ; New York, : J. Wiley, 1994
ISBN	1-282-13792-1 9786612137921 0-470-51467-1 0-470-51468-X
Descrizione fisica	1 online resource (293 p.)
Collana	Ciba Foundation symposium ; ; 187
Altri autori (Persone)	Frazerl. H (Ian H.)
Disciplina	616.99 616.992061
Soggetti	Viral carcinogenesis Viral vaccines Cancer - Immunotherapy Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Ciba Foundation"--Cover. Symposium held at the Ciba Foundation, London, 15-17 March 1994, based on a proposal by Ian Frazer.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	VACC I N ES AGAI NST VIRALLY INDUCED CANCERS; Contents; Participants; Introdu ction; Potential antigenic targets on Epstein - Bar r vir us-associated tumours and the host response; The host response to lesions induced by human papillomavirus; General discussion I; Human T cell lymphotropic virus: necessity for and feasibility of a vaccine; Vaccination against cutaneous and mucosal papillomavirus in cattle; Strategies for studying mouse and human immune responses to human papillomavirus type 16 Prospects for T cell immunotherapy of tumours by vaccination with immunodominant and su bdominant peptidesHepatitis B virus infection, the immune response and hepatocellular carcinoma; The role of superantigens in the immunobiology of retroviruses; General discussion I I; Assembly and transport of class I MHC-peptide complexes; Induction and regulation of CD4+ T cell subsets; Propagation of mouse and human T cells with defined antigen

specificity and function; Immunity to the HER-2neu oncogenic protein
Genetic modification of T cell clones to improve the safety and efficacy
of adoptive T cell therapy Bone marrow-derived cells present MHC class
I-restricted tumour antigens in priming of antitumour immune
responses; Evasion of host immune responses by tumours and viruses;
Final discussion; Index of contributors; Subject index

Sommario/riassunto

An interdisciplinary and multinational group of specialists present
contributions describing the current status of vaccines against virally
induced tumors and discuss the means by which they can be improved.
