

1. Record Nr.	UNINA9910144828303321
Titolo	14th Annual Conference on Composites and Advanced Ceramic Materials [[electronic resource]] : a collection of papers presented at the 14th Annual Conference on Composites and Advanced Ceramic Materials...January 14-17, 1990, Cocoa Beach Holiday Inn and Cocoa Beach Hilton and Towers, Cocoa Beach, FL / / Liselotte J. Schioler, program chair
Pubbl/distr/stampa	Westerville, OH, : American Ceramic Society, 1990
ISBN	1-282-31502-1 9786612315022 0-470-31300-5 0-470-31567-9
Descrizione fisica	1 online resource (598 p.)
Collana	Ceramic engineering and science proceedings ; ; 11/7-8
Altri autori (Persone)	SchiolerLiselotte Jensen
Disciplina	666 666.05
Soggetti	Ceramics Composite materials Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	14th Annual Conference on Composites and Advanced Ceramic Materials; Table of Contents; Is There Anything of Practical Value Hidden Amongst the Composite-Toughening Theories?!-A Jim Mueller Perspective; The Department of Defense Materials and Structures Science and Technology Programs; NASA Advanced Ceramics Program Overview; Advanced Ceramics Program at NIST; Opportunities for the Industrial Application of Continuous Fiber Ceramic Composites; The Spectacular Growth of the Engineering Ceramics Division; Microstructure, R-Curves, and Strength of Monophase Ceramics The Microstructural Design of a Mechanically Interlocking Ceramic MicrostructureMicrostructural Characterization of Silicon Nitride Ceramics Processed by Pressureless Sintering, Overpressure Sintering, and Sinter HIP; Secondary Phase Devitrification Effects upon the Static

Fatigue Resistance of Sintered Silicon Nitride; The Effect of
 Microstructure on the High- Temperature Deformation Behavior of
 Sintered Silicon Nitride; Dynamic Fracture Toughness and
 Microstructural Fracture Mechanisms in Ceramics; Toughening in
 Ceramic Particulate and Whisker Composites
 Ultrasonic Homogenization of Dense Colloidal Suspensions of SiC,
 /A1203 Composites Mechanical Properties and Microstructure of Si₃N₄-
 Whisker-Reinforced Si₃N₄ Matrix Composites; Effect of Fracture
 Temperature and Relative Crack Propagation Rate on the Fracture
 Behavior of Whisker-Reinforced Ceramic Matrix Composites; SiC
 Reinforced-MoSi₂/WSi₂ Alloy Matrix Composites; Creep of SiC Whisker-
 Reinforced Alumina under Compressive Loading; Reaction-Based
 Processing Methods for Ceramics and Composites
 Mechanical Properties of 2-D Nicalon Fiber- Reinforced LANSIDE™
 Aluminum Oxide and Aluminum Nitride Matrix Composites The Effect of
 Oxide Additives in Filler Materials during Directed Melt Oxidation
 Process; Tailoring of Reaction-Bonded Al₂O₃ (RBAO) Ceramics.;
 Preparation and Characterization of Reaction-Bonded Aluminum Oxide
 (RBAO) Matrix SiC Particulate Filler Composites; Properties of RBSN and
 RBSN-SiC Composites; Development of Reaction-Bonded Electro-
 Conductive TiN-Si₃N₄, and Resistive Al₂O₃-Si₃N₄ Composites
 Status of Continuous Fiber-Reinforced Ceramic Matrix Composite
 Processing Technology Production of Silicon Nitride/Silicon Carbide
 Fibrous Composites Using Polysilazanes as Pre-Ceramic Binders;
 Nicalon/Siliconoxycarbide Ceramic Composites; Fiber-Reinforced
 Glasses and Glass Ceramics Fabricated by a Novel Process; Interfacial
 Microstructure and Mechanical Properties of SiC/ZrTiO₂ Composites
 Hot-Pressed in CO; Matrix Density Effects on the Mechanical Properties
 of SiC Fiber-Reinforced Silicon Nitride Matrix Properties
 Characterization of Alumina/Yttrium-Aluminum Garnet and
 Alumina/Yttrium-Aluminum Perovskite Eutectics

Sommario/riassunto

This volume is part of the Ceramic Engineering and Science Proceeding
 (CESP) series. This series contains a collection of papers dealing with
 issues in both traditional ceramics (i.e., glass, whitewares, refractories,
 and porcelain enamel) and advanced ceramics. Topics covered in the
 area of advanced ceramic include bioceramics, nanomaterials,
 composites, solid oxide fuel cells, mechanical properties and structural
 design, advanced ceramic coatings, ceramic armor, porous ceramics,
 and more.
