Sommario/riassunto

This book offers the first in-depth examination of the life and writings of Lama Zhang (1122-1193), key figure in the Tibetan renaissance. Controversial, larger-than-life, already revered as a literary innovator and tantric meditation master, Zhang entered public life in mid-career and forged a new model of rulership and religious community that would set the standard for later religious rulers of Lhasa—most notably the Dalai Lamas. The focus of the model was the tantric hermit who comes down from the mountains and sustains a worldly community through his mastery of space, time, and symbol. The subject is approached through a complex of related issues: lineage and tradition-formation, charisma and hegemony, literary genre, textual economy, and the politics of tantra.

syndromes -- Hodgkin's lymphoma -- Histiocytoses.

Sommario/riassunto

Hematopoietic neoplasms are the most common animal tumors for which chemo- or radiation therapy are now given. New research, information, and images unavailable in any previous publication now make it possible to examine these diseases, categorize for treatment, and in some cases ascertain the impact on survival. A ground-breaking book in veterinary medicine, *Veterinary Comparative Hematopathology* is a heavily illustrated comprehensive reference on hematopoietic neoplasms in domestic and laboratory animals. The book enables veterinary pathologists and oncologists to provide more specific
