

1. Record Nr.	UNINA9910144843003321
Titolo	58th Conference on Glass Problems [[electronic resource] ] : proceedings of the 58th Conference on Glass Problems : October 14-15, 1997, the University of Illinois at Urbana-Champaign, Urbana, IL / / John Kieffer, editor
Pubbl/distr/stampa	Westerville, OH, : American Ceramic Society, c1998
ISBN	1-282-31469-6 9786612314698 0-470-29446-9 0-470-29495-7
Descrizione fisica	1 online resource (187 p.)
Collana	Ceramic engineering & science proceedings ; ; 19/1
Altri autori (Persone)	KiefferJohn
Disciplina	666.1 666/.1
Soggetti	Glass Ceramics Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	58th Conference on Glass Problems; Table of Contents; Is Your Glass Full of Water? - Part II; Fighting Heat Loss and Volatility: An Oxy-Gas Forehearth Conversion for Borosilicate Glass; Optimization of Oxy-Fuel Combustion with Optical Sensors; An Oxy-Gas Furnace for Lead Crystal Glass Melting; Investigation of Liquid Contact Refractory Corrosion Under Oxy-Fuel Glass Melting Atmospheres; Determination of Corrosion Factors in Glass Furnaces; Looking Beyond the "Oxy-Fuel Issues for Glassmaking in the '90s" Workshop; Technology Priorities: Results of the Glass Technology Roadmap Workshop Process Improvement Through Statistical Control Advanced Control of Glass Tanks Using Simulation Models and Fuzzy Control; Superstructure Corrosion in Glass Tanks: Comparison of Mathematical Model with Field Measurements; Rapidox: A New Tool for Redox Measurements in Glass Samples; low-Cost Stirrer Physical Modeling in Quarter-Scale; Industrial Experience with a New Cruciform Solution for

## Regenerator Plugging

---

### Sommario/riassunto

This volume is part of the Ceramic Engineering and Science Proceeding (CESP) series. This series contains a collection of papers dealing with issues in both traditional ceramics (i.e., glass, whitewares, refractories, and porcelain enamel) and advanced ceramics. Topics covered in the area of advanced ceramic include bioceramics, nanomaterials, composites, solid oxide fuel cells, mechanical properties and structural design, advanced ceramic coatings, ceramic armor, porous ceramics, and more.
