

1. Record Nr.	UNINA9910145018103321
Titolo	Fluxional organometallic and coordination compounds [[electronic resource] /] / edited by Marcel Gielen, Rudolph Willem, Bernd Wrackmeyer
Pubbl/distr/stampa	Hoboken, NJ, : J. Wiley, c2004
ISBN	1-280-27095-0 9786610270958 0-470-30013-2 0-470-85845-1 0-470-85844-3
Descrizione fisica	1 online resource (343 p.)
Collana	Physical organometallic chemistry ; ; v. 4
Altri autori (Persone)	GielenM <1938-> (Marcel) WillemR (Rudolf) WrackmeyerBernd <1947->
Disciplina	541/.2242
Soggetti	Coordination compounds Organometallic chemistry Molecular dynamics Nuclear magnetic resonance spectroscopy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Fluxional Organometallic and Coordination Compounds; Contents; Contributors; Series Preface; Preface; 1 Polyhedral Dynamics and the Jahn-Teller Effect; 1 Introduction; 2 Polyhedron Topology; 3 Polyhedral Isomerizations: Microscopic Models; 3.1 Diamond-Square-Diamond Processes; 3.2 Gale Diagrams; 3.3 Generation of Metallaborane Structures by Diamond-Square-Diamond Transformations in Deltahedra; 4 Polyhedral Isomerizations: Macroscopic Models; 4.1 Topological Representations of Polyhedral Isomerizations; 4.2 Topological Representations of Jahn-Teller Distortions; 5 Acknowledgement; 6 References 2 NMR Studies of Intramolecular Dynamics in Allylic Type Triorganoboranes1 Introduction; 2 Discovery Activation Parameters of [1,3]-B Shifts; 3 Fluxional Linear Polyunsaturated Allylboranes; 3.1 2,4-

Pentadienyl(di-n-propyl)borane; 3.2 2,4,6-Heptatrienyl(di-n-propyl)borane; 4 Dynamic Behavior of Cyclic Allylboranes; 4.1 Dynamic Equilibria Between 2-(Dialkylboryl)methylenecyclobutanes and 1-(Dialkylboryl)cyclobutenes; 4.2 Dynamic Properties of Cyclopentadienyl and Pentamethylcyclopentadienyl Derivatives of Boron; 4.3 Synthesis and Dynamic Properties of 1-Indenyl(diethyl)borane 4.4 Dynamic Behavior of Cycloheptadienyl(di-n-propyl)borane 4.5 Synthesis and Dynamic Properties of Cycloheptatrienyl(di-n-propyl)borane. Equilibrium with 7-(Di-n-propylboryl)norcaradiene; 4.6 Three Independent Dynamic Processes in the Irontricarbonyl Complex of Cycloheptatrienyl(di-n-propyl)borane; 4.7 Cyclooctatetraenyl(di-n-propyl)borane; 4.8 Sigmatropic Migrations and Thermal Rearrangements in Cyclononatetraenyl(di-n-propyl)borane. Comparison with the Dynamic Properties of Cyclononatetraenyl(trimethyl)tin; 4.9 Borotropic Migrations in Phenalenyl(di-n-propyl)borane 24

5 Diverse Chemoselectivity of Cyclic Polyunsaturated Organoboranes 5.1 Chemical Behavior of Borane 23; 5.2 Diverse Chemoselectivity of 9-Cyclopentyl-9-borabarbaralane 54e; 6 Conclusion; 7 References; 3 Dynamic Behavior of Group 5 and 6 Transition Metal Complexes with NMR; 1 Introduction; 2 Rotational Isomerism in Amido and Ketimido Complexes; 2.1 Rotational Isomerism in Oxofluoramido Complexes of Tungsten(VI); 2.2 Restricted M-NR(2) Rotation in the Dinuclear Complexes with M(2)(6+) Core (M = W, Mo) 2.3 Features of Dynamic Behavior of Amido Cyclopentadienyl Complexes of Group 5 Transition Metals 2.4 Internal Hindered Rotation of Ketimido Ligands; 3 Dynamic Behavior of d(0) Transition Metal Complexes with n-Donor Two-Center Ligands; 3.1 Isomerization of Fluorocomplexes of Group 5-6 with O, N-Two-Center Ligands; 3.2 Isomerism of Transition Metal Complexes with N, N-Two-center Ligands; 3.3 Nature of Bonding of n-Donor Two-center Ligands in d(0) Transition Metal Complexes; 3.4 Mechanism of Internal Hindered Rotation of h(2)-Bound Ligands; 4 Conclusion; 5 References 4 Conformational Mobility in Chelated Square-planar Rh, Ir, Pd, and Pt Complexes

## Sommario/riassunto

This series offers leading contributions by well-known chemists reviewing the state of the art of this wide research area. Physical organometallic chemistry aims to develop new insights and to promote novel interest and investigations applicable to organometallic chemistry. This volume focuses on several important topics on fluxionality in organometallic and coordination chemistry, reviewed by experts in each of the respective fields. It is intended to provide both authoritative concepts and stimulating ideas in order to tackle dynamics from different angles, aiming at an interdisciplinary a
