Chapter 6 Shaping Pre-Registration Mental Health Nursing Education Through User and Carer Involvement in Curriculum Design and Delivery

Sommario/riassunto

Psychiatric and Mental Health Nursing: The Field of Knowledge provides an analytical and critical introduction to the current state of knowledge in psychiatric and mental health nursing in the UK. The first section of the book explores current professional, disciplinary and educational contexts. In the second section leading UK authors from diverse academic settings provide case studies of the knowledge and scientific traditions they draw on to inform their practice, understand patient needs, and foster different aspects of nursing practice. In the final section the UK authors co
