Price -- Upper gastrointestinal surgery / Ian Felstead -- Surgery of the lower gastrointestinal tract / Ian Felstead -- Urological surgery / Ian Felstead and Jane McLean -- Women's health / Fiona J. McArthur-Rouse -- Orthopaedic surgery / Ann Newman -- Identifying and managing life-threatening situations / Tim Collins and Catherine I. Plowright.
Sommario/riassunto	Assessing and managing the acutely ill adult surgical patient focuses on major surgical conditions and interventions commonly encountered

in District General Hospitals which potentially require intensive monitoring and intervention. It emphasizes the importance of thorough assessment and interpretation of clinical data, and provides the necessary knowledge to help nurses make sense of their findings and to integrate theory and practice in relation to surgical care. Part one addresses principles of surgical care for all patients undergoing surgery -- including pre-operative assessment an
