Sommario/riassunto	<p>The International Journal on Interactive Design and Manufacturing (IJIDeM) presents interdisciplinary research, technical issues, and original industrial implementations. It examines the development, handling, and design of highly realistic, multi-sensorial virtual prototypes for improving decision-making in product design and manufacturing. Readers discover cutting-edge research in the fields of mechatronics, design and manufacturing sciences, numerical and mechanical engineering, and virtual reality. IJIDeM explores a variety of techniques, including the description of industrial problems in</p>

identifying significant knowledge and variables; advanced modeling of design and manufacturing problems; virtual exploration of solution spaces; building of highly realistic, multi-sensorial simulators; and implementation of user-centered, innovative methods.
