Sommario/riassunto	El periodisme i la política són dos mons que viuen en una relació complexa, sovint contradictòria, que demana un compromís extra per a l'informador que decideix fer carrera explorant les entranyes del poder i que en aquest llibre anomenarem samurais. Perquè sense periodisme lliure no hi ha política lliure, els periodistes polítics són els guardians de la democràcia, i per això necessiten ser ensinistrats en les tècniques que els permetran fer bé la feina i evitar caure en els múltiples paranys que el poder ens posarà. Esteu preparats per a formar part d'aquesta orde tan especial i única?.
