Sommario/riassunto

This volume, a sequel to *The Psychology of Interrogations, Confessions and Testimony* which is widely acclaimed by both scientists and practitioners, brings the field completely up-to-date and focuses in particular on aspects of vulnerability, confabulation and false confessions. This is an unrivalled integration of scientific knowledge of the psychological processes and research relating to interrogation, with the practical investigative and legal issues that bear upon obtaining, and using in court, evidence from interrogations of suspects. *
