Sommario/riassunto

The academic and policy interest in the development of cities, the
renewal of residential and older industrial neighbourhoods in cities,
and issues to do with race, polarisation and inequality in cities has
remained at the forefront of policy and academic debate across Europe
and North America. This book provides an important new contribution
to these debates and highlights specific issues and developments which
are crucial to an understanding of debates about residence, renewal
and community empowerment. engages with the urban regeneration,
development and housing aspect
