

1. Record Nr.	UNINA9910145948703321
Titolo	Geophysical research abstracts (GRA) // European Geophysical Society
Pubbl/distr/stampa	[Katlenburg-Lindau, Germany], : Published by Copernicus on behalf of the European Geophysical Society
ISSN	1607-7962
Soggetti	Earth sciences Space sciences Geophysics Earth Sciences Periodical Periodicals.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	"Geophysical Research Abstracts (GRA) is an international, interdisciplinary journal for the publication of collections of short summaries (abstracts) of up-to-date research in the Earth, planetary and space sciences in separate issues. The collections may include summaries of presentations at scientific meetings or extended summaries on well defined topics compiled by editors or organizations. All summaries must undergo an access-review by the session conveners, editors or organizers, and they are then edited in the GRA journal style, compiled and published by the EGU Meeting and Production Office. Editors or organizers should contact the Managing Editor before circulating their general announcement for publication. Geophysical Research Abstracts (GRA) is published primarily on the World Wide Web (WWW) as a free-access publication. However, it may also be published on CD-ROM for the participants at meetings and conferences or for public use at small subscription rates. Geophysical Research Abstracts (GRA) is published by Copernicus GmbH on behalf of the European Geosciences Union (EGU)"--Journal's home page.
