Sommario/riassunto

Type 2 diabetes is a growing problem for the developed and developing countries and it is a burden on healthcare systems as well as individuals. *Nutraceuticals, Glycemic Health and Type 2 Diabetes* primarily focuses on the nutraceuticals that assist in preventing and managing prediabetes and type 2 diabetes. The book gives an overview of glycemic health and highlights the use of novel and upcoming nutraceutical ingredients such as bioactive peptides, traditional herbs from China, India and Mexico, resistant starches, cinnamon, chromium and others. After the successful commercial applicat
