| Soggetti | Silicon - Physiological effect Organosilicon compounds Silicon in the body Electronic books. |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Editors: David Evered (organizer) and Maeve O'Connor. Based on the Symposium on Silicon Biochemistry, held at the Ciba Foundation, London, 17-19 September 1985. "A Wiley-Interscience publication." |
| Nota di bibliografia | Includes bibliographical references and indexes. |
| Nota di contenuto | Silicon biochemistry; Contents; Participants; General introduction; Sources and speciation of aluminium and silicon in natural waters; Introduction to silicon chemistry and biochemistry; Structural aspects of biogenic silica; Silicification by diatoms; Silica in higher plants; General discussion; A primer on organosilicon chemistry; Silicon as an essential trace element in animal nutrition; Biological implications of the interaction (via silanol groups) of silicon with metal ions; Aluminosilicates and the ageing brain: implications for the pathogenesis of Alzheimer's disease Effects of silica on lung collagen Urinary and serum silicon in normal and uraemic individuals; Silica and oesophageal cancer; Biocompatibility of silicates for medical use; Final general discussion; |

Index of contributors; Subject index

Sommario/riassunto

Silicon is the second most abundant element in the Earth's crust, and is found in water, plants and organisms. The contributors describe how silica gets into and out of organisms and discuss how essential or harmful silicon or silicon-based compounds are in higher animals.

2. Record Nr.

UNIORUON00494636

Autore

KONIG, Eberhard

Titolo

Französische Buchmalerei um 1450 : der Jovenel-Maler, der Maler des Genfer Boccaccio und die Anfänge Jean Fouquets / Eberhard König

Pubbl/distr/stampa

Berlin, : Mann, 1982

ISBN

37-86113-11-4

Descrizione fisica

278 p., 168 p. di tav. : ill. ; 30 cm.
