1.	Record Nr.	UNINA9910146235503321
	Autore	Harper Charlie <1931->
	Titolo	Analytic methods in physics
	Pubbl/distr/stampa	[Place of publication not identified], : Wiley VCH, 1999
	ISBN	1-280-55952-7 9786610559527 3-527-60307-7
	Descrizione fisica	1 online resource (317 pages)
	Disciplina	530.15/5
	Soggetti	Mathematical analysis Mathematical physics Engineering & Applied Sciences Applied Physics
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Bibliographic Level Mode of Issuance: Monograph
	Nota di contenuto	1. Vector analysis -- 2. Modern algebraic methods in physics -- 3. Functions of a complex variable -- 4. Calculus of residues -- 5. Fourier series -- 6. Fourier transforms -- 7. Ordinary differential equations -- 8. Partial differential equations -- 9. Special functions -- 10. Integral equations -- 11. Applied functional analysis -- 12. Geometrical methods in physics -- Bibliography-- Index.
	Sommario/riassunto	This book presents a self-contained treatment of invaluable analytic methods in mathematical physics. It is designed for undergraduate students and it contains more than enough material for a two semester (or three quarter) course in mathematical methods of physics. With the appropriate selection of material, one may use the book for a one semester or a one quarter course. The prerequisites or corequisites are general physics, analytic mechanics, modern physics, and a working knowledge of differential an integral calculus.
