Sommario/riassunto	As recent events in Iraq demonstrate, countries that have suffered through civil war or rule by military regime can face a long, difficult transition to peaceful democracy. Drawing on the experiences of peacekeepers in Bosnia, Haiti, Rwanda, and Afghanistan, From War to Rule of Law demonstrates that newly emerging democracies may need much more than emergency economic support. Restoring the rule of law, Joris Voorhoeve shows, can involve the training of a new police force, for example, or the creation of an international war crimes tribunal. Any disregard for human rights or delay in civilian reconciliation can lead to serious resurgences in violence. Voorhoeve

concludes by offering specific recommendations for members of the United Nations and the European Union, as well as individual donors. Given the nature of today's armed conflicts, *From War to Rule of Law* provides new hope for all those concerned about the lasting success of international peacekeeping missions.
