

1. Record Nr.	UNINA9910146293903321
Titolo	Encyclopedia of algorithms // Ming-Yang Kao, editor
Pubbl/distr/stampa	New York, N.Y. : , : Springer, , 2008
ISBN	0-387-30162-3
Edizione	[1st ed. 2008.]
Descrizione fisica	1 online resource (liii, 1166 pages) : illustrations
Collana	Springer reference
Disciplina	518.103
Soggetti	Algorithms Arithmetic - Foundations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (pages [1053]-1155) and indexes.
Nota di contenuto	VLSI -- Distributed Computing -- Parallel Processing -- Automated Design -- Robotics -- Graphics -- Data Base Design -- Software Tools -- Sorting -- Searching -- Data Structures -- Computational Geometry -- Linear Programming.
Sommario/riassunto	The Encyclopedia of Algorithms provides a comprehensive set of solutions to important algorithmic problems for students and researchers, including high-impact solutions from the most recent decade. A must-have for computer scientists, this encyclopedic reference has been edited by Ming Yang Kao, Editor-in-Chief of the top journal in the field, Algorithmica. All of the entries have been written and peer-reviewed by experts in the field. Nearly 400 entries are organized alphabetically by problem, with subentries for distinct solutions. Extensive cross-references support efficient, user-friendly searches for immediate access to useful information. This defining reference is published both in print and online. The print publication includes an index of subjects and authors as well as a chronology for locating recent solutions. The online edition supplements this index with hyperlinks as well as including internal hyperlinks to related entries in the text, CrossRef citations, and links to additional significant research. Open problems, links to downloadable code, experimental results, data sets, and illustrations are included.
