Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This volume constitutes the natural development of the theoretical conclusions reached by the author in a previous publication, dedicated to the transition from the ban on mandate to party mandate. The analysis of the provisions present in the Spanish legal system on the subject of parliamentary parties and groups, and in particular of those aimed at countering the phenomenon of parliamentary transfuguism, confirms in fact that it is possible to draw from the traditional principles on political representation meanings more in line with the particular role. that the parties carry out in the present representative democracies, without thereby undermining their foundations.
