

1. Record Nr.	UNINA9910146408503321
Titolo	Advances in enzymology and related areas of molecular biology . Volume 76 [[electronic resource] /] / edited by Eric J. Toone
Pubbl/distr/stampa	Hoboken, New Jersey, : Wiley, 2009
ISBN	1-282-11273-2 9786612112737 0-470-39288-6 0-470-39287-8
Descrizione fisica	1 online resource (296 p.)
Collana	Advances in enzymology and related areas of molecular biology ; ; v. 76
Altri autori (Persone)	TooneEric J
Disciplina	572.654 612.0151
Soggetti	Enzymes - Metabolism Enzymes - Industrial applications Enzymes - Synthesis Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	ADVANCES IN ENZYMOLOGY AND RELATED AREAS OF MOLECULAR BIOLOGY Volume 76; CONTENTS; Contributors; Preface; Inosine 5 - Monophosphate Dehydrogenase; Natural Product Glycosyltransferases: Properties and Applications; Combinatorial and Evolutionary Design of Biosynthetic Reaction Sequences; Trends in Microbial Synthesis of Natural Products and Biofuels; Author Index; Subject Index
Sommario/riassunto	Encompasses the latest advances in the field. New series editor, Daniel Purich, is a well-known biochemist and enzymologist.
