

1. Record Nr.	UNINA9910146534903321
Autore	Dini P (Petre)
Titolo	AICT/SAPIR/ELETE 2005 - Telecommunications 2005: Advanced Industrial Conference on Telecommunications/Service Assurance with Partial and Intermittent Resources Conference/E-Learning on Telecommunications Workshop (17-22 July 2005/Lisbon, Portugal)
Pubbl/distr/stampa	[Place of publication not identified], : IEEE Computer Society Press, 2005
ISBN	9781509099986 1509099980
Descrizione fisica	1 online resource : illustrations
Disciplina	621.382
Soggetti	Telecommunication Telecommunication in education
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	Telecommunications is the key economical factor in bridging countries and cultures, speeding the economy, and synchronizing the research topics across multi-national groups and universities. This conference on telecommunications is a special event where, for the first time, the traditional advanced topics on telecommunications and the new ones on service assurance with intermittent resources are complemented by special topics on e-learning on telecommunications. The suite of events, AICT / SAPIR / ELETE 2005, held under the generic topic Telecommunications 2005 was very well perceived by the international community. The proceedings is rich and dense, covering next generation networks aspects, routing, services, security, QoS, optical networks, management, communications and multiple evaluations and improvement techniques. On the service assurance on partial with intermittent resources (SAPIR) the key topics are centered on handling and monitoring, routing, and web services in such environments. In the e-learning section (ELETE) the authors present international project-based experiments, models, and Internet and web-based methods.
