

1. Record Nr.	UNINA9910147227903321
Titolo	IEEE Standard on Transitions, Pulses, and Related Waveforms : IEEE Std 181-2003 // IEEE Instrumentation and Measurement Society Subcommittee on Pulse Techniques
Pubbl/distr/stampa	New York, NY : , : Institute of Electrical and Electronics Engineers, , 2003
ISBN	0-7381-3571-2
Descrizione fisica	1 online resource (viii, 54 pages) : illustrations
Collana	Institute of Electrical and Electronics Engineers
Disciplina	621.381534
Soggetti	Pulse techniques (Electronics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This standard presents approximately 100 terms, and their definitions, for accurately and precisely describing the waveforms of pulse signals and the process of measuring pulse signals. Algorithms are provided for computing the values of defined terms that describe measurable parameters of the waveform, such as transition duration, state level, pulse amplitude, and waveform aberrations. These analysis algorithms are applicable to two-state waveforms having one or two transitions connecting these states. Compound waveform analysis is accomplished by decomposing the compound waveform into its constituent two-state single-transition waveforms.
