Sommario/riassunto	This volume is the third in a series that examines Canada's economic relationships with the countries of East Asia. The purpose of this volume is to illuminate the links among the peoples of the region that Canadians needs to understand when doing business abroad or cooperating with East Asians in North America. The book's six papers examine the role of culture in institutional similarities and differences,

both within East Asia and between East Asia and the west, the impact immigrants have on the receiving economy, the role of education and human capital in economic growth, and the role international linkages like trade, investment, cooperation and immigration play in the spread of knowledge.
