

1. Record Nr.	UNINA9910148791703321
Autore	Hicks Jamie
Titolo	Preparation, Characterisation and Reactivity of Low Oxidation State d-Block Metal Complexes Stabilised by Extremely Bulky Amide Ligands // by Jamie Hicks
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2017
ISBN	9789811029059
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XXVII, 196 p. 149 illus., 70 illus. in color.)
Collana	Springer Theses, Recognizing Outstanding Ph.D. Research, , 2190-5053
Disciplina	547.05
Soggetti	Organometallic chemistry Chemistry, Inorganic Catalysis Organometallic Chemistry Inorganic Chemistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Doctoral Thesis accepted by Monash University, Clayton, VIC, Australia."
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	General Introduction -- Extremely Bulky Amido d-Block Metal(II) Halide Complexes -- Preparation of Low Oxidation State Manganese Complexes Stabilised by Bulky Amide Ligands -- Preparation of Low Oxidation State Group 12 Complexes Stabilised by Bulky Amide Ligands -- Preparation of Low Oxidation State Cobalt Complexes Stabilised by Bulky Amide Ligands -- Preparation of Molybdenum Aminogermylene and Amidogermylene Complexes -- Appendix.
Sommario/riassunto	This thesis describes the synthesis and characterization of numerous metal-metal bonded complexes that are stabilized by extremely bulky amide ligands. It provides a comprehensive overview of the field, including discussions on groundbreaking complexes and reactions, before presenting in detail, exciting new findings from the PhD studies. The thesis appeals to researchers, professors and chemistry undergraduates with an interest in inorganic and/or organometallic chemistry.
